

UNION BUILT PC

WE ORGANIZE LABOR

Established in 2001, with the distinct purpose of giving Labor the digital tools needed to excel in the new age of Information Technology. We have effectively leveled the playing field between large corporations and the Labor Industry, enabling Union Officers to represent their membership more effectively. We have accomplished this with Computer Hardware specifically designed for Unions, as well as our Grievance Manager Software that fully automates the Grievance Process.

Our Mission of *"Helping Unions Excel in Everything They Do"* is as true today as it was in 2001. Union Built PC is a 100% Union Shop with decades of experience working in the Labor Industry as members, officers and activists. We are extremely proud of what we have been able to accomplish for Labor, especially our custom designed Grievance Manager Application for IAMDL 142.
